

A decorative graphic on the left side of the slide, consisting of a network of white lines and circles on a blue gradient background, resembling a circuit board or a tree structure.

# WEEK 2

MAPPING MANY TO MANY RELATIONSHIPS FROM AN ER DIAGRAM INTO A RELATIONAL DATABASE.

CS3319

# STUDENT OBJECTIVES

- Upon completion of this video, you should be able to:
  - Look at an ER Diagram and represent each of the *Many to Many* relationship in the relational model.
  - Given a ternary relationship in an ER diagram, map it correctly to the tables and attributes in the relational model

# REPRESENTING MANY TO MANY RELATIONSHIPS USING ONLY TABLES

Suppose now we add have the tables:

COURSE	
<u>CourseNumber</u>	CourseName
CS3319	Intro to Databases
CS2210	Data Structures and Algorithms
CS1027	CS Fundamentals II
MA2222	Discrete Structures

PROFESSOR

FirstName	LastName	<u>EmplID</u>	Office	Ext
Laura	Reid	11	ST238	86905
Doug	Vancise	22	MC 421	83355
Michael	Atkinson	15	SSC 44	83456
Stuart	Rankin	18	MC 101	87678
Jamie	Andrews	34	MC 343	86789
Irving	Robinson	56	MC 102	86733

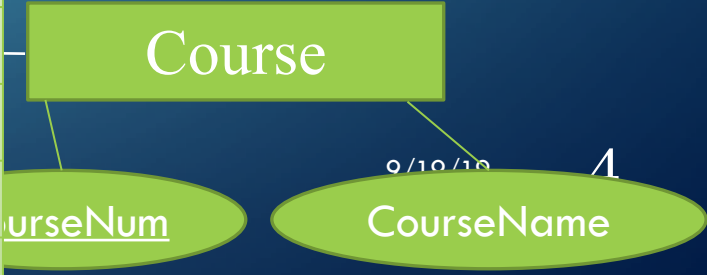

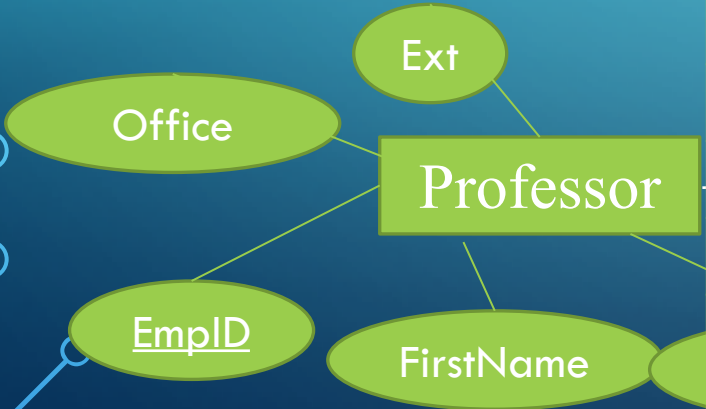

And we have the following relationship:

How do we show that Laura and Doug teach CS3319 AND Doug, Laura and Jamie teach CS2210 AND Doug teaches CS1027 AND Irving and Stuart teach MA2222?

COURSE		PROFESSOR					
CourseNumber	CourseName	FirstName	LastName	EmpID	Office	Ext	Teaches
CS3319	Intro	Laura	Reid	11	ST238	86905	CS3319, CS2210
CS2210	Data	Doug	Vancise	22	MC 421	83355	CS3319, CS2210, CS1027
CS1027	CS I	Michael	Atkinson	15	SSC 44	83456	NULL
MA2222	Discrete	Stuart	Rankin	18	MC 101	87678	MA2222
		Jamie	Andrews	34	MC 343	86789	CS2210
		Irving	Robinson	56	MC 102	86733	MA2222

CS3319	11
CS3319	22
CS2210	11
CS2210	22
CS2210	34
CS1027	22
MA2222	18
MA2222	56

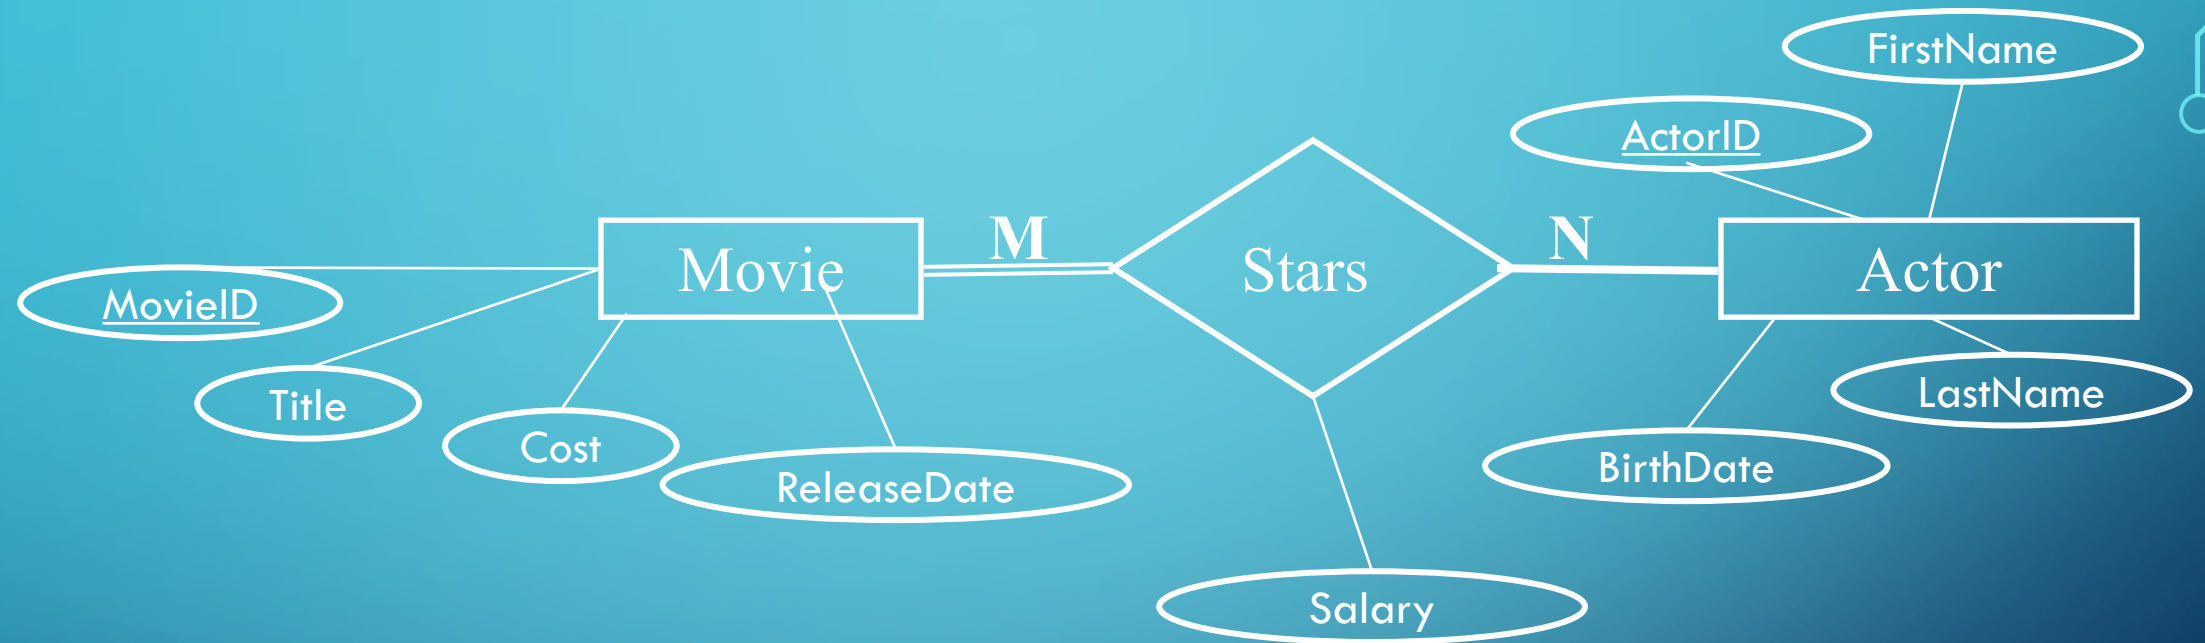

In Many To Many relationships, you make a NEW table and the key for the new table is the combination of the keys from the entities participation in the many to many relationship. Also include any attributes on the relationship in the new table.

**QUESTION: What is the primary key of table NEW table called TEACHES**  
**EmpID AND CourseNum ?**

**What are the foreign key(s) of the table TEACHES? EmpID AND CourseNum**

# ANOTHER EXAMPLE OF HOW TO MAP MANY TO MANY RELATIONSHIPS TO A RELATIONAL DATABASE:

## Movie

<u>MovieID</u>	Title	Cost	ReleaseDate
----------------	-------	------	-------------

## Actor

<u>ActorID</u>	FirstName	LastName	BirthDate
----------------	-----------	----------	-----------

## Starring

<u>*MovieID</u>	<u>*ActorID</u>	Salary
-----------------	-----------------	--------

## TERNERY RELATIONSHIPS

- Take all the keys involved and put them in a new table and they make up the new key and also include any extra attributes.

Table rr

<u>aid</u> *	<u>bid</u> *	<u>cid</u> *	rattr
