

Niger

Main Problem:

- high debt: difficult for government to borrow funds => the case study should not include advice that consumes much money since the government could not have sufficient funds.

What's more, nit might cause a credit risk, and increase the instability.

- refugees:

- safety issues:

- investments: domestics & foreign

- low literacy rate: adult rate = 35%, youth rate = 43%. But the unemployment rate is incredibly low: 0.7%, poverty is high: 42% extreme poverty

Fertility rate = 6.9 per woman

Cartaceptus prevalence = 11% per married women

Gini = 37.3

GDP growth = 1.4%

Policies:

-> target health: provide contraceptive education

Rural leaders/commundy member to either produce

Goal: improve enrollment

Improve literacy rate
