

Rewrite Rules ?

1. $XOR = \lambda p.\lambda q.p \quad \wedge \vee \boxed{\text{edit}} -$
 $(NOT\ q)\ q$

2. NOT = $\wedge \vee \neg \oplus$

$\lambda p. \lambda q. \lambda r. p \wedge r \vee q$

3. $F = \lambda p. \lambda q. q$ 

4. $T = \lambda p.\lambda q.p$

5. Church Numerals (e.g. 3 will be replaced by $\lambda f.\lambda x.f (f (f x))$)

$$id = \lambda x.x$$

Active Strategy ?

- Innermost first

- Outermost first

Derivation ?

$$XOR\ p\ (NOT\ p)$$

Start

$$1. \quad \overline{(XOR)_p} \overline{(NOT)_p} \quad \because \delta$$
$$2. \quad \boxed{(\lambda p. \lambda q. p(\text{NOT } q)q)} \quad p \quad (\text{NOT } p) \quad \therefore \beta$$
$$3. \quad \overbrace{(\lambda q.p(\text{NOT } q)q) \quad (\text{NOT } p)} \quad \because \beta$$
$$4. \quad p(\overline{(NOT)((NOT)p)})((NOT)p) \quad \because \delta$$
$$5. \quad p(\overbrace{(\lambda p. \lambda q. \lambda r. prq)}^{\text{not } p} (\overline{NOT} p)) (\overline{NOT} p) \quad \therefore \beta$$
$$6. \quad p(\lambda q.\lambda r.(\overline{NOT}prq))(\overline{NOT}p) \quad \therefore \delta$$
$$7. \quad p(\lambda q.\lambda r.\overbrace{(\lambda p.\lambda q.\lambda r.prq)}^p)rq)((NOT)p) \quad :: \beta$$
$$8. \quad p(\lambda q.\lambda r.\overbrace{(\lambda q.\lambda r.prq)}^r)q)(\overline{NOT}p) \quad :: \beta$$

9. $p(\lambda q.\lambda r.(\overbrace{(\lambda r1.pr1r)}^q))(\overbrace{(NOT)p}^{\vdash \beta})$

10. $p(\lambda q.\lambda r.pqr)(\overline{NOT}p) \quad :: \delta$

$$11. \quad p(\lambda q.\lambda r.pqr)((\overbrace{(\lambda p.\lambda q.\lambda r.prq)}^{\beta}) \quad p) \quad \therefore \beta$$

12. $p(\lambda q.\lambda r.pqr)(\lambda q.\lambda r.prq)$
