

Introduction to Data- 1 & 2. 2y Book.

Types : Variables : items that could hold different value of the same type.

Quantitative : Numerical values that represent value

Categorical : Values belong to the same category.

Continuous : Numerical values that are infinite along a range.

Discrete : Countable numerical values that are finite within a range

Nominal : Values in category with no order.

Ordinal : Values in category with an ordering.

Present : Location : In memories, in files.

Representation : Bits

Interpretation : Binary.
