

Answer for Part 1

NOTES:

- score is derived attribute on playedAT because you could work it out from goals attribute on the performed relationship
- I forgot to mention that each team would have 6 players, so I don't think it is fair, if a student didn't understand hockey to not accept both (6, 24) here OR (12, 48). PLEASE ACCEPT BOTH ANSWERS (see Green Pointer and text)
- Students can put M or a number (as long as, if it was a number it was the correct value) on the relationship lines, either way is fine, for example (see Red Pointers):
